This proceeding provides a written record of the synergy between these communities. It represents a solid framework from which new interaction will result in the future. The scope of the conference has made participants enthusiastically submit their full paper. There are selected papers to be published in Scopus indexed international journals and accredited national journals. The review is performed after passing the plagiarism check since it is a crucial part of the publication process. The researchers and experts conducted the review process with a single-blind review system.

The challenging part of the conference is always on the smoothness of the conference day. Thus, for all the best preparation for the conference and publication, we would like to express our sincere gratitude to the organizing committee for their strong commitment to the accomplishment of the conference.
